## U.S. CENSUS BUREAU AMERICAN COMMUNITY SURVEY DATA

The rest of this profile consists of data from the American Community Survey, which is administered annually by the U.S. Census Bureau. The survey contacts one percent of all residents annually to generate data on a range of topics. However, accurate data from a single year of survey responses can only be generated for areas containing at least 65,000 people; five-year averages are reported for less populated geographies. To ensure that data are available for all areas and comparable across the state, all Community Profiles use these five-year averages that cover the years 2019 through 2023. Estimates with overlapping years should not be compared, since the repetition of sample data leads to statistical errors. For viable comparisons, the two prior non-overlapping five-year averages (2009-2013 and 2014-2018) are also provided. Each year, as new data is released, the profiles will increase by one year in the same manner, ensuring that non-overlapping five-year averages are always what is being compared.
